We Specialize in:

Pneumatics & General Mechanical Engineering, manufacture of Pneumatic Linear Actuators, Valve Operating Gearboxes, fabrication repairs to earth moving equipment, CNC machining, full 4th Axis machining and moulds.

Our Machinery includes:

- 3 CNC operating lathes
- 2 CNC Operated Milling Centers
- 2 Conventional Lathes
- 2 Conventional Milling Machines
- CO₂, Tig, Arc & Spot welding Machines.

Working in accordance with ISO 9001:2000

Company Profile

Jovi Engineering is a vibrant mechanical engineering company operating in accordance with the ISO9001:2000 quality management system standard. Jovi Engineering was established in 1984 by two brothers, Victor and Jose Da Silva.

Over the years Jovi Engineering has progressed and grown dramatically, and is now considered to be one of the most respected engineering companies operating in the East Rand. This can be directly contributed to Jovi Engineering's use of innovation, technology and the need to continuously finding better ways to improve the quality of Jovi Engineering's products and the services offered to our customers.

Initially only specializing with pneumatics and general mechanical engineering we now offer a wide variety of general engineering products including the manufacturing of pneumatic linear actuators, fabrication repairs to earth moving equipment, CNC machining, Multi-surface machining, full 4th axis machining and moulds.

Our customer base includes companies such as De Beers, Macsteel, Trident SA, as well as many other well known and established organizations. Our products are used in both the local and international markets spanning to areas such as Zambia, Zimbabwe, Mozambique and Botswana.

Policy & Objectives

Jovi Engineering's Quality Policy is to achieve sustained, profitable growth by providing services which consistently satisfy the needs and expectations of our customers, to maintain an effective assurance system complying with the international standard ISO 9001:2000 and to continually improve the effectiveness of our Quality Management System.

This level of quality is achieved through adoption of a system of procedures that reflect the competence of our company to existing customers, potential customers and independent auditing authorities.

Achievement of this policy involves all staff, who are individually responsible for the quality of their work. Resulting in a continually improving working environment for all. This policy and objectives is provided and explained to each employee by the MR/CEO and is reviewed annually for continuing suitability.

To achieve and maintain the required level of assurance the CEO retains responsibility for the Quality System with routine operation controlled by the MR (Management Representative).

The objectives of the Quality Assurance System are:

- a) To maintain an effective assurance system complying with the International Standard ISO 9001:2000
- b) To achieve and maintain a level of quality which enhances the company's reputation with customers
- c) To Endeavour at all times, to maximize customer satisfaction with the services provided by Jovi Engineering
- d) To ensure on time delivery of defect free product
- e) To create a working environment that is not only professional but enjoyable as well
